Dhriti Chawla

Sr. Software Engineer

Android Engineer with 6 years of experience building analytics SDKs and logging infrastructure at scale. Leads cross-team platform projects from technical specs through rollouts, with a focus on reliability, adoption, and developer experience.

Experience

Software Engineer | L3 *Jan 2024 - Present*

Yelp, Inc., Remote

- Designed and productionized the Android SDK for behavioral analytics at Yelp, including entity context APIs, remote config, observability logs and debug tooling; Defined adoption metrics and led cross-team enablement for the same
- Led the auto-tracking project to automatically fire funnel events from UI interactions using YAML tracking plans, reducing per-event instrumentation from ~40 lines to 1–2 lines
- Migrated Android logging from a Rust-based library to a native Kotlin implementation, improving maintainability and eliminating cross-language debugging overhead
- Integrated AI tooling (Claude Code, Cursor) into Android development workflow for accelerated debugging, code generation, and technical documentation; authored custom Claude skills for team-specific workflows

Software Engineer | L1-L2 *Aug 2020 - Dec 2023*

Yelp, Inc., San Francisco, CA

- Built and maintained Android mobile SDKs for logging, experimentation, and event tracking used by all product teams
- Integrated client-side sessions on Android for improved stability, consistency, and cost-effective measurement
- Led Rust core-allocation-logic deprecation on mobile and server-driven SDK readiness projects

Software Engineering Intern *May - Aug 2019*

Quizlet, San Francisco, CA

Worked on implementing a new speech-to-text feature into the study modes on the Android application; conducted user research & testing to analyze and procure data for the same.

Android Teaching Assistant, *Facebook University* *May - July 2018*

CodePath, Menlo Park, CA

Mentored Meta (formerly Facebook) University Android interns through a rigorous summer program, unblocking complex Java/Kotlin code and guiding final mobile app deployment.

Leadership

- Mentor for Awesome Women in Engineering (AWE) in 2025 through Yelp's Engineering program
- Android App release management at Yelp since 2022; manage release cadence, triage blockers, and coordinate with feature teams
- Founded and led the New Employee Welcoming Society (NEWS) at Yelp since 2021 to manage discovery sessions, buddy programs, newsletters, and panel series for distributed onboarding
- Conducting technical interviews for Android engineering candidates at Yelp since 2021

Technical Skills

- **Languages:** Kotlin, Java, Python, SQL, YAML
- **Android:** Jetpack Compose, Android Views, Coroutines, Lifecycle/Architecture Components, Gradle, Android Studio
- **AI-Assisted Development:** Claude Code CLI, Cursor, Gemini; integrated into daily workflows for code generation, debugging, architecture research, documentation drafting, and data analysis
- **Tools & Infra:** Git, JIRA, Bugsnag, Remote Config, CI/CD, S3, IntelliJ IDE
- **Domains:** SDK design, analytics instrumentation, event tracking systems, performance optimization, observability & dashboards

Education

Purdue University *West Lafayette, IN*

Bachelor of Science in Computer Science *Aug 2016 – May 2020*
